

OH-CW2513

Ohio Crop Weather

June 24, 2013

There were six days suitable for fieldwork in Ohio during the week ending June 23, according to the USDA, NASS, Great Lakes Region. Producers made significant progress on fieldwork this week due to the combination of low precipitation and favorable temperatures throughout the State. Producers harvested a significant amount of first cutting **hay**, and some were even beginning their second cutting. Producers also sprayed for weeds and side dressed **corn**. Some were able to begin harvesting **wheat**, but most were preparing equipment with the expectation of harvesting **wheat** in the next couple weeks. Row crops all remain in good condition, but will need rain in the coming weeks to avoid moisture stress.

Soil moisture for week ending 06/23/13				
Stratum	Very short	Short	Adequate	Surplus
	Percent	Percent	Percent	Percent
Topsoil	0	12	76	12
Subsoil	1	10	79	10

Crop progress for week ending 06/23/13				
Crop	This week	Last week	Last year	5-year average
	Days	Days	Days	Days
Days Suitable for Fieldwork	6	3	--	--
	Percent	Percent	Percent	Percent
All hay, first cutting	84	73	NA	NA
All hay, second cutting	8	0	NA	NA
Corn, emerged	100	98	100	99
Oats, headed	80	51	94	71
Soybeans, planted	100	97	100	97
Soybeans, emerged	96	86	100	92
Winter wheat, harvested	1	0	17	6

Crop condition for week ending 06/23/13					
Crop	Very poor	Poor	Fair	Good	Excellent
	Percent	Percent	Percent	Percent	Percent
All Hay	1	5	27	51	16
